10:00- 11:30	Ibero-American cooperation in meteorology, climate change and water: The successful experience of the regional networks CIMHET, RIOCC and CODIA	International and Ibero-American Foundation for Administration and Public Policies (FIAPP) Spanish Agency for International Cooperation and Development (AECID)	Spanish Ministry for the Ecological Transition and the Demographic Challenge (MITECO) Iberoamerican Network of Climate Change Offices (RIOCC) Conference of Directors of the Iberoamerican Meteorological and Hydrological Services (CIMHET) Conference of Iberoamerican Water Directors (CODIA) International and Ibero-American Foundation for Administration and Public Policies (FIAPP) Spanish Agency for International Cooperation and Development (AECID) EUROCLIMA Programme World Meteorological Organization (WMO) Economic Commission for Latin America and the Caribbean (ECLAC) National Institute of Seismology, Volcanology, Meteorology and Hydrology of Guatemala Directorado General de Asociaciones Internacionales (INIPA) Banco Interamericano Desarrollo (BID) Banco de Desarrollo de América Latina (CAF)	The prevention and management of extreme hydrometeorological events requires adequate climate data and information on current climate and future climate change scenarios. This is essential for hydrological planning and climate change adaptation policies and measures. The Ibero-American networks CIMHET, CODIA and RIOCC, with the support of the cooperation agencies AECID and FIAPP as well as regional and multilateral organizations and programs, have been working together for several years to identify joint priorities and key actions to be developed at the regional level building bridges between the 3 sectors. In this context, European cooperation has also given relevance and follow-up to the lines of actions identified in the framework of the joint work of the 3 networks, in particular, efforts that are currently materializing will be presented, such as the high resolution climate change scenarios for Central America and the web viewer that has been developed, key tools for the design and implementation of adaptation policies and projects. These regional initiatives and programs show the value of peer-to-peer cooperation between Latin America and Europe, favoring the bi-regional exchange of knowledge and tools, and could be of interest for other regions.	Elsa Velasco (FIAPP)	Panelist 1 - Ana Pintó (RIOCC/Spanish Climate Change Office) Panelist 2 - Reinaldo Gutiérrez (CIMHET/ Chile) Panelist 3 - Iván Delgado (CODIA/ Costa Rica) Panelist 4 - Willson W. García (National Institute of Seismology, Volcanology, Meteorology and Hydrology/ Guatemala) Panelist 5 - Carles Puigmarí (INIPA) Panelist 6 - Albert Martí (WMO) Panelist 7 - José Eduardo Alatorre (ECLAC) Panelist 8- Andrés de Zulueta (AECID) Panelist 9- Alicia Montalvo (CAF) Panelist 10- Valentina Saavedra (BID)
11:45- 12:30	Projection for adaptation to climate change: vulnerability and flood zones as a tool for adaptation	Government of the Canary Islands	Government of the Canary Islands and Government of the Balearic Islands	Canary and Balearic Islands are a highly vulnerable areas that faces serious challenges related to climate change. PIMA - Adapta Costas is a recent study that shows what are the main socioeconomic and ecological risks that the archipelagos will face in the upcoming years. In this side-event some of the tools to face these challenges will be presented.		Panelist 1- José Antonio Valbuena Alonso: Regional Secretary for Ecological Transition, Climate Change and Land Planning (Government of the Canary Islands) Panelist 1-Elena Jinámar Tomas Ribot: Climate Change and Atmosphere Service. Regional Secretary of Energy Transition and Productive Sectors (Government of the Balearic Islands).
13:00-14:30	Ocean & Climate: Opportunities & Threats	The Varda Group	Ministry for the Ecological Transition (Spain). Leducfly Philanthropy. Ocean & climate Platform. IPCC.	The 2022 summer in the Northern hemisphere was torrid also under the ocean. Absorbing 90% of the excess heat and 25% of the CO2 we produce, the ocean is the engine room of the climate system. But this comes at a cost for the ocean.	Rémi Parmentier, Director of The Varda Group	Panelist 1 – Teresa Ribera, Deputy Prime Minister (Spain). Panelist 2 – Dona Bertarelli: Philanthropist, ocean advocate & sportswoman. Panelist 3 – Marine Lecerf: International Policy Officer (Ocean & climate Platform). Panelist 4 –Hans-Otto Pörtner: Co-chair IPCC WG 2. Panelist 5 –Carl, Gustaf Lundin, CEO & Managing director, Mission Blue Panelist 6 - Sebastian Unger, Federal Ocean Commissioner, Germany.
16:00-17:00	Leadership on climate action: an intergenerational dialogue between women and youth leaders	Ministry for the Ecological Transition and the Demographic Challenge (MITECO).	Women leaders in climate action from Governments, Multilateral organizations, Think tanks and CSOs (tbc) Activists from the youth climate movement from Spain and other countries (tbc)	In recent years, the prioritization and acceleration of the climate agenda in the international arena has benefitted from the energy and increasing engagement of young activists (youth movements structured around platforms and CSOs) and of women leaders at decision-making positions (at highest level of Governments, of Multilateral Institutions, of think tanks and CSOs). Both key players have arguably assumed a leading role in accelerating responses to the climate emergency. Yet, in light of the latest NDCs Synthesis Report, the Emissions Gap Report and the latest IPCC AR6 report: more is needed to accelerate and amplify climate responses. What are the lessons have we learned from climate action leadership that should be capitalized in the future? Could youth and women leaders join forces for a more effective climate action? What are success factors and synergies to be tapped? As we enter a decisive decade for action, what are the risks for the climate movement? These, and other strategic questions on climate leadership will be explored in this intergenerational dialogue.	Ms Megan Rowling (Reuters Foundation)	- Lara Padilla , Independent expert of the Spanish Citizen Assembly for Climate - Nisreem Elsaïm, Chair of Sudan Youth Organization on Climate Change - Pablo Morente, Climate action lead, Consejo de la Juventud de España - Nicole Becker, co-founder of "Youth for Climate, Argentina" - Mary Robinson, Chair of The Elders - María Neira, Director Public Health & Environment, World Health Organization - Teresa Ribera, Deputy Prime Minister for Ecological Transition
17:30-19:00	Debate: Political proposals to accelerate the fight against Climate Change	Congres of Deputies	Congres of Deputies	Members of the different Parliamentary Groups debate about their proposals to fight against climate change	Germán Renau Martínez: Member of Parliament. Congress of Deputies	Panelist 1 – Ms. Helena Caballero Gutiérrez. Spokesperson of the GP Socialista. Congress of Deputies. Panelist 2 – Mr. Diego Gago Bugarín. Spokesperson of the GP Popular en el Congreso. Congress of Deputies. Panelist 3 – Mr. Juan Antonio López de Uralde Garmendia. Spokesperson of the GO Confederal de Unidas Podemos- En Comú Podem- Galicia en Común. Congress of Deputies. Panelist 4- Mr. Joan Capdevila i Esteve. Spokesperson of the GP Republicano. Congress of Deputies. Panelist 5- Ms. Inés Sabanés Nadal. Spokesperson of the GP Plural. Congress of Deputies. Panelist 6- Ms. María Carmen Martínez Granados. Spokesperson of the GP Ciudadanos. Congress of Deputies.
